projects (id, student_id, course_id, title, submission_url, status, submitted_at)

notifications (id, user_id, message, type, is_read, created_at)

Dashboard Structure

1. Welcome Section

- Display a welcome message with the student's name.

- Show the user's profile picture/avatar.

2. Dashboard Summary

Display summary cards containing:

- Total Enrolled Courses
- Completed Courses
- Courses In Progress
- Certificates Earned

3. My Enrolled Courses

For each enrolled course, display:

- Course Name
- Course Thumbnail (Optional)
- Progress Bar
- Continue Learning Button

4. Course Search and Filter

Provide options to:

- Search courses by course name
- Filter courses by category

5. Learning Progress

Display the student's overall learning progress using:

- Progress Bar
- Progress Chart (Optional)

6. Recent Activity

Display the student's recent activities, such as:

- Recently Enrolled Courses
- Recently Completed Lessons/Modules
- Latest Achievements

7. Notifications Pane

Display important notifications, including:

- New Course Announcements
- Assignment or Quiz Reminders
- Certificate Availability
- Platform Updates

8. Upcoming Deadlines / Assignments

Display upcoming academic tasks, including:

Assignment Due Dates

- Quiz Deadlines
- Project Submission Dates

9. Recommended Courses

Suggest courses based on:

- Student Interests
- Learning History
- Popular Courses
- Similar Categories

10. Learning Streak

Display the student's learning consistency, such as:

- Current Learning Streak (e.g., 7 Days)
- Total Study Days
- Motivation Message

- Assignment Due Dates
- Quiz Deadlines
- Project Submission Dates

9. Recommended Courses

Suggest courses based on:

- Student Interests
- Learning History
- Popular Courses
- Similar Categories

10. Learning Streak

Display the student's learning consistency, such as:

- Current Learning Streak (e.g., 7 Days)
- Total Study Days
- Motivation Message

11. Quick Actions

Provide quick navigation to:

- Browse Courses
- My Courses
- Profile
- Certificates (Optional)

12. Loading State

- Display a loading spinner or skeleton loader while dashboard data is being fetched.

13. Error State

- Display a user-friendly error message if data cannot be loaded.
- Provide a Retry button to reload the dashboard.
